## OUR LADY IMMACULATE CATHOLIC PRIMARY SCHOOL MUSIC POLICY

---

**The purpose of this document is to state the aims, principles, strategies and organisation of the teaching of music through Reception, Key Stage 1 and Key Stage 2**  
**National Curriculum statement**

*‘Music is a universal language that embodies one of the highest forms of creativity. A high-quality music education should engage and inspire pupils to develop a love of music and their talent as musicians, and so increase their self-confidence, creativity and sense of achievement. As pupils progress, they should develop a critical engagement with music, allowing them to compose, and to listen with discrimination to the best in the musical canon. ‘*

Aims and objectives

The objectives of teaching music in our school follow those set out in the national curriculum and will enable children to:

- perform, listen to, review and evaluate music across a range of historical periods, genres, styles and traditions, including the works of the great composers and musicians
- learn to sing and to use their voices, to create and compose music on their own and with others, have the opportunity to learn a musical instrument, use technology appropriately and have the opportunity to progress to the next level of musical excellence
- understand and explore how music is created, produced and communicated, including through the inter-related dimensions: pitch, duration, dynamics, tempo, timbre, texture, structure and appropriate musical notations.

### **Planning and teaching**

Children learn best when learning activities are well planned, ensuring progress in the short, medium and long term. Our school uses the Charanga scheme of work as supported by Liverpool Resonate Hub. The Charanga Musical School Scheme provides teachers with week by week lesson support for each year group in the school which includes a weekly lesson with a specialist music teacher. It is ideal for specialist and non-specialist teachers and provides lesson plans, assessment, clear progression, and engaging and exciting whiteboard resources to support every lesson.

The Scheme supports all the requirements of the new National Curriculum. And provides a practical, exploratory and child-led approach to musical learning.

Music planning is highly kinaesthetic to support all learning styles and unique to each year group, as the specialist music support teacher links closely with the school’s curriculum maps and topic work.

Approved by the Governing body: 3<sup>rd</sup> October 2016

## **Assessment**

Assessment is undertaken in a range of ways;

- Questioning in order to understand children's musical understanding, ie open-ended questioning and using the outcomes to guide formative assessment.
- Sharing what has taken place during the lesson which is also a great skill when working towards performing to an audience.
- Videos and voice recordings are to be taken on first and last lesson to evaluate progression (monitored by subject leader)

Although class teachers will make a formative assessment judgement on the children within their class, the specialist music teacher will also provide half termly assessments linked to the skills taught during the sessions that support the schools LCC assessment grid.

## **The Foundation Stage**

Children in Reception do have access to the specialist music teacher each week, but music is also taught in reception classes as an integral part of the topic work covered during the year. We relate the musical aspects of the children's work to the objectives set out in the Early Learning Goals (ELGs) which underpin the curriculum planning for children aged three to five. Music contributes to a child's personal and social development. Counting songs foster a child's mathematical ability, and songs from different cultures increase a child's knowledge and understanding of the world.

## **The contribution of music to teaching in other curriculum areas**

### *English*

Music contributes significantly to the teaching of English in our school by actively promoting the skills of reading, writing, speaking and listening. Children develop their language skills through singing songs, with attention to diction, meaning, rhythm and rhyme. They use reference books, and develop research skills, when finding out about the history of music and musicians. Music is also used to stimulate discussion or creative writing. Through working with others in a musical setting, children develop their ability to communicate ideas effectively. In animation projects music can be an effective vehicle to contribute to creativity within the curriculum.

### *Mathematics*

The teaching of music contributes to children's mathematical understanding in a variety of ways. Children who study the structure of music are observing patterns and processes. Talent in music is often linked with talent in mathematics, as the rhythm and structure of music is mathematically based.

### *Personal, social and health education (PSHE) and citizenship*

Music contributes significantly to the teaching of personal, social and health education and citizenship. Through the common goal of making music, children learn to work effectively with other people, and to build up good relationships. Music is the basis of many social activities, and

Approved by the Governing body: 3<sup>rd</sup> October 2016

Date of next review: Autumn 2018

has an important role to play in the personal development of many young people. It has a vital role to play in building self-confidence. Participation in successful public musical performances is sometimes one of the most memorable things young people do at school.

### *Spiritual, moral, social and cultural development*

Creating, performing or listening to music can sometimes be a moving and even spiritual experience. We encourage children to reflect on the important effect that music has on people's moods, senses and quality of life. Children at Our Lady Immaculate Catholic Primary School have the opportunity to encounter music from many cultures (as in African Week,) and through their growing knowledge and understanding of the music, they develop more positive attitudes towards other cultures and societies.

### **Music and ICT**

Information and communication technology enhances the teaching of music, where appropriate, in all key stages. Children use computer programs to compose music. They also use ICT to enhance their research skills, whether through the Internet or on CD-ROMs. They listen to music on the Internet, and they record their own compositions to send to other schools electronically. They might experiment with editing voice recordings, which involves the use of a digital sound recorder. Children also use ICT to improve the presentation of their work. They can also use music to enhance their cross-curricular work e.g. creating soundtracks for their animations and podcasts.

### **Music and inclusion**

At our school we teach music to all children, whatever their ability and individual needs. Music forms part of the school curriculum policy to provide a broad and balanced education to all children. Through our music teaching we provide learning opportunities that enable all pupils to make good progress. We strive hard to meet the needs of those pupils with special educational needs, those with disabilities, those with special gifts and talents, and those learning English as an additional language, and we take all reasonable steps to achieve this. For further details see separate policies: Special Educational Needs; Disability Non-Discrimination and Access; Gifted and Talented; English as an Additional Language (EAL).

Children who have Special Educational Needs and Disability (SEND), will have targeted support through a personalised School Support Plan (SSP) or Play Plan. This will be created by teaching staff in partnership with pupils and their parents. The SSP may include, as appropriate, specific targets relating to music.

### **Assessment for learning**

Children demonstrate their ability in music in a variety of different ways. Teachers will assess children's work in music by making informal judgements as they observe them during lessons. This may look like;

- Questioning in order to gauge children's musical understanding, ie open-ended questioning and using the outcomes to guide formative assessment.
- Share what has taken place during the lesson and work towards performing to an audience.

Approved by the Governing body: 3<sup>rd</sup> October 2016

Date of next review: Autumn 2018

- Videos and voice recordings are to be taken on first and last lesson to evaluate progression. All to be shared on shared drive.

### **Resources**

All staff are given the charanga log in to be able to access all the interactive resources on line.

All instruments are stored in one place and are accessible to the specialist music teacher and all staff.

### **Monitoring and review**

The subject leader will monitor the teaching of music by the specialist music teacher as well as supporting all teaching staff with updates and resources throughout the year.

This policy will be reviewed every two years.
